

INSTALLING A INTERNAL PANEL IN AN EXISTING STRUCTURE

1. INSTALL A 75 X 35 X 35 CHANNEL 0.5 MM GALV. STEEL IN FLOOR USING MASONRY BOLTS (A)
 2. INSTALL IN LINE ABOVE A LIGHT STEEL ANGLE
 3. PUSH THE PANEL IN THE CHANNEL THEN RAISE IT VERTICAL AND FIX THE TOP WITH BOLTS
- MAKE SURE THE PANEL LENGHT IS CORRECT. PERPENDICULAR WALLS WILL GIVE MORE STRENGHT TO IT
SKIRTINGS AND CORNICES WILL HIDE THE FIXINGS.
